DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-25, drawn to a method for authenticating network entities, classified in class 726, subclass 3.
- II. Claims 26-50, drawn to methods and apparatuses for processing, transmitting and receiving encrypted frames, classified in class 713, subclass 160.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as generally transmitting data and information for purposes other than authenticating network entities. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
